

# Elite Command Training - 2024

## FEMA L-0954 All Hazard Safety Officer Course

### Instructor:

#### Deputy Fire Chief Mike Bryant (ret.)

Is a 35-year veteran of the County of Los Angeles Fire Department. Chief Bryant served as a chief officer for 17 of his 35 years of service. He's has been a qualified Incident Commander, Operations Section Chief, and Safety Officer throughout numerous all-hazard emergencies in his career.

This safety officer class is probably the most important and informative course you will ever take in your career. Chief Bryant's programmatic style will help shape you to make effective and safe decisions in environments of danger, chaos, uncertainty, and fog of war.

Chief Bryant will demonstrate how to align your tactical decision making with the incident priorities, strategy, and modes of operation to effectively navigate hazards, risk, and threats.

**Prerequisites:** ICS 100, 200, 300, IS-700 & 800

**Certification:** FEMA L-954 certificate sent via FEMA/EMI 8-10 weeks to the student's FEMA email address.

### Safety Officer Course Locations

**Designed:** Those who are interested in becoming Type III and line safety officers in "all hazard" environments. There is pre-course work assigned once you have registered for the course.

**Course Description:** All emergency responders need to be skilled at-risk assessment and decision-making in today's hazardous environments. Designed to meet the training needs of the Safety Officer position in the incident command system and the requirements of CICCIS Qualifications. Please bring a laptop with you to class each day. Student materials are on flash drives. All attendees shall obtain their FEMA student ID number prior to class.
